

IN THE SPECIFICATION

~~Please replace the paragraph beginning at page 8, line 9, with the following rewritten paragraph:~~

A1
Figures 8a and 8b depict a high level logic flowchart of a process and program for controlling user recording of messaging sessions in accordance with the method, system, and program of the present invention; and

~~Please replace the paragraph beginning at page 10, line 26, with the following rewritten paragraph:~~

A2
Processor **12** may be a general-purpose processor such as IBM's PowerPC™ processor that, during normal operation, processes data under the control of operating system and application software stored in a dynamic storage device such as random access memory (RAM) **14** and a static storage device such as Read Only Memory (ROM) **16**. The operating system preferably provides a graphical user interface (GUI) to the user. In a preferred embodiment, application software contains machine executable instructions that when executed on processor **12** carry out the operations depicted in the flowcharts of **FIGS. 8a and 8b, 9**, and others described herein. Alternatively, the steps of the present invention might be performed by specific hardware components that contain hardwire logic for performing the steps, or by any combination of programmed computer components and custom hardware components.

~~Please replace the paragraph beginning at page 24, line 26, with the following rewritten paragraph:~~
